

COT 3100, HW1 assignment, Fall 2013

Tim Davis

due Aug 26, 2013 at 3pm

Do the following problems from Rosen, 7th Edition. Be sure you use the 7th Edition, since the problems can differ (and will differ) in other editions.

All problems are in section 1.1. Do these: 2, 4, 8, 10, 14, 20, 22, 28, 32

Some problems involve the converse, inverse, and contrapositive, which we will discuss in class on Friday. So you may wish to wait until then, when we finish our discussion of section 1.1.
