

Homework 1

Due by Jan 16 16:30

1. Download **Eclipse ADT bundle** from <http://developer.android.com/sdk/index.html>
2. Install the bundle following the instructions at:
<http://developer.android.com/sdk/installing/bundle.html>
3. Download the source code of FlagQuizGame app from course site at piazza.com.
4. Start Eclipse and create a new project using **FlagQuizGame** app source code by following the steps below:
 - a. File -> New -> Other -> Android Project From Existing Code
 - b. Choose “Root Directory” as the source code directory of the application you downloaded (c:\...\FlagQuizGame) and check “Copy projects into workspace”.

- c. Run the application on emulator (nexus 4) and submit the screenshot.
5. Now go to “Building Your First App” section in Training part of developer.android.com (<http://developer.android.com/training/basics/firstapp/index.html>). Follow the steps and create your first application. Your program should display the message “Hello [Yourname]” where it displays your name instead of “Hello World”. Submit the screenshot of your app.

Deliverables:

1. Submit a document showing the screenshots of the emulator for two apps. Name the document as **firstname-lastname-hw#.pdf**. For example erdogan-dogdu-hw1.pdf. Document should have a header like the following:

BİL425 Software Development for Mobile Apps (Spring 2014)
Homework 1
Date: Jan ??, 2014
Name: **Firstname Lastname**
2. Submit your homework to bil425bahar14@gmail.com (email attachment).
