

Homework 3

Due by Jan 30 16:30

Subject: Intent, ScrollView, LayoutInflater

1. **(Enhanced Favorite Twitter Searches App)** Make the following enhancement to the Favorite Twitter Searches app: Provide a **Delete button** for each search so the user can discard individual searches.
2. **(Word Scramble Game)** Create an app that scrambles the letters of a word or phrase and asks the user to enter the correct word or phrase. After each word is entered, a message shows at the bottom with the result ("Correct" or "Incorrect") and buttons asking to move to the **Next** word or **Stop** the game. Keep track of the user's score and report after at most 10 questions on a separate screen with a ScrollView, correct words are listed with blue color and wrong/skipped words are listed with red color. Bonus feature: Add a timer function giving the user a limited amount of time to answer.

Deliverables:

1. Submit a zip file named **firstname-lastname-hw#.zip** containing the following:
 - a. A document showing the screenshots of the emulator or the device for two apps (Enhanced Favorite Twitter App and Word Scramble Game). Name the document as **firstname-lastname-hw#.pdf**. For example erdogan-dogdu-hw1.pdf. Document should have a header like the following:

BiL425 Software Development for Mobile Apps (Spring 2014)
