

Breccia

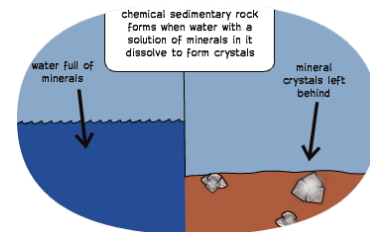

A sedimentary rock made

Cementation

When sediments are glued together to form rock.

Chemical Rock

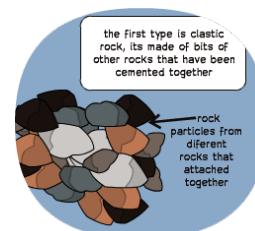

Sedimentary rocks formed when minerals are dissolved in water and then the water evaporates.

Chert

A hard sedimentary rock made from decomposed sea life. Chert has been

Clastic Rock

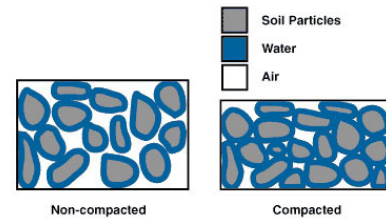

Sedimentary rocks formed when pieces of other rocks or sediments are cemented together.

Coal

A sedimentary rock made from decomposed dead plants.

Compaction

When layers of sediment are squeezed together.

Conglomerate

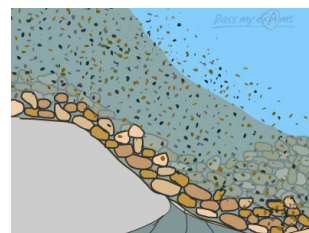

A sedimentary rock made with large, rounded particles.

Coquina

A sedimentary rock made from fossilized seashells stuck together.

Deposition

When pieces of rock are dropped and no longer moving.

Erosion

The movement of pieces of rock from one place to another.

Limestone

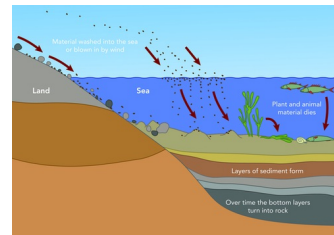

A sedimentary rock made from decomposed marine creatures.

Sandstone

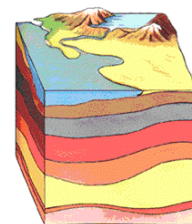

Sedimentary Rock

Rocks formed from other rocks and minerals.

Sedimentation

When layers of rocks, sand, clay and other particles are deposited in layers over millions of years.

---

Sediments

Loose pieces of rock, sand, dust, clay, or dirt.

---

Shale

A sedimentary rock made from microscopic mud particles.

---

Weathering

Any process that breaks rocks down into smaller pieces.

---
