CSC 443: WEB PROGRAMMING
TERM PAPER

DUE: DECEMBER 7, 2016

Ivan Sutherland, a winner of the ACM Turing award and a noted entrepreneur and researcher in the field of computer graphics, wrote in 1982 an essay entitled "Technology and Courage." In this essay, Sutherland describes how courage is essential moving the boundaries of technology. The essay also touches on the issue of courage in starting a new research problem or a new start-up company.

Read Sutherland's essay and describe how it relates to technology in general and to web technology in specific in 2016, commenting on the paper and its validity.
