

Cloud & Cluster Data Management

Project 4 Guidance

1

Project 4 Presentation

- Remember that these presentations should be 10 minutes
- Suggested slides:
 1. Title, with group members and name of system
 2. Slide saying which queries you did, how much of the data you were able to load
 3. Reminder of your data model (mention any changes you needed to make from previous presentation).
 4. Brief description of the approach to the two queries you are demoing
 5. [Do demo]
 6. What you would change about the model or queries next time
 7. Lessons learned about your system, advice to others

2

Appendix

For each query, include a slide summarizing the approach and giving the answer you obtained.

3

Also

- Bring one hard copy of the slides – two slides per side is easiest for me.
- You will need to hook up to either a VGA or a full-size HDMI plug.
You can test a machine if you want after class today or Thursday.
- Don't forget
 - Post a copy of your code to Piazza by 5p next Tuesday: PDF with comments and people's names
 - Two-page report due at presentation time.
