Emergency Preparedness Drill  
Tuesday, Mar 20<sup>th</sup>, 2018

# Emergency Preparedness

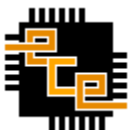

Did you know that ...

- *Tippecanoe County has more tornado touchdowns on average than any other county in the state?*
- *On campus, **seven** outdoor all hazards warning sirens sound during tornado warnings, active threats such as a shooting on campus, and hazardous materials releases.*

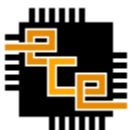

# Emergency Preparedness

- On **Tuesday Mar 20<sup>th</sup>**, at approx. **10:15 AM**, Indiana will conduct its annual tornado drill as part of the state's "Severe Weather Preparedness Week".
- The purpose of the drill is to provide a reminder to prepare and practice so that when an emergency occurs, we are ready to take the necessary action to protect ourselves.
- Purdue will also conduct a voluntary campus-wide tornado warning drill to help the Purdue family prepare for tornadoes.
- More information on the Purdue Voluntary Tornado Drill can be found on the [Emergency Preparedness website](#).

# Emergency Procedures

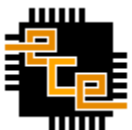

- The outdoor all hazard warning sirens on Purdue's campus mean dangerous circumstances are occurring on campus and signal you to immediately go inside the closest building to seek more information.
- Emergencies may include severe weather, an active threat (such as a shooting) or a major hazardous chemical release.

# Emergency Procedures (2)

Once inside, seek shelter based on the emergency:

- 1. Tornado warning:** On the lowest floor of the building away from glass
- 2. Active threat, such as a shooting:** In a room that can be locked, barricaded, or secured in some way.
- 3. Major hazardous materials incident:** In an interior room above ground with the fewest windows or vents
