CENG 499
Introduction to Data Science

Project Proposal

Write a project proposal with the following information:

- **Team name** or acronym
- **Team members** (at most 2 students)
- **Title**
- **Data** (explain where you will get the data from, the source of it – whether downloaded, scraped from the web, or obtained via an API, the expected size of the data, and the data elements in the set)
- **Description** (explain the aim of the project)
- **Goals** (what data analysis results do you expect to achieve?)
- **Tools** (libraries, etc.)
